

IDEAHUB is looking for senior developer position to join our R&D team on full-time basis.

An exciting and unique opportunity to become a part of Scrum team that develops a cloud SAAS product which monitor 30,000,000 sites around the world. The Product runs on hundreds of servers which generate 100G of new data which needs to be crunch using big data analytics tool in order to provide insights for our customers. We are now expanding and plan to monitor not only Websites but also Mobile devices and Videos.

Responsibilities:

- *The team will have responsibility for specific critical components in our product.*
- *Define and execute iterative functional and automated testing for their development tasks.*
- *The team will take part on developing features together with the development team in Israel or will get full responsibility for features which will need to be development and tested and shipped to the production*

Requirements:

- *We are top innovative technologies in our product (ex: QT, Solar, Exasol, ETL, REST, Video...). We don't expect our developers to know them all but we expect them to be "Fast Learners" so they will be able to cope with any new technology that is needed*
- *At least 4 years' experience with Java/C++*
- *"Can Do" attitude – someone that love new technologies and love to overcome new challenges*
- *Fast Learner*
- *Being familiar with agile development frameworks, e.g. SCRUM*
- *SQL experience with MySQL or other DBs*
- *Fluent in English, both spoken and written*
- *Academic IT education on master level in Computer Science or Engineering*

Desirable:

- *Linux hands on*
- *Experience building large scale distributed systems*
- *Experience with NoSQL DBs*
- *Experience with QT 4/5 & SiteScrapping*
- *Experience with online advertising / AdTech*
- *Experience with Mobile environments – An advantage*

Personal qualities:

- *Smart, Fast learner*
- *Working well autonomously, without close supervision, readiness to take responsibility*
- *Highly developed communication skills*
- *Organized & committed person which can commit to timely delivery of quality results*
- *Knowledge seeking, updated with latest technological and eager to learn new stuff*
- *Documenting his/her code and general functionality*

What's in it for you?

- *Variety of knowledge sharing, training and self-development opportunities*
- *Competitive salary*
- *Cool, centrally located office with warm atmosphere which creates really good working conditions. The only office with free parking in town.*
- *Various courses on project management, communication and programming available*
- *Options to participate in our shares program*
- *Opportunity to lead a team of developers*
- *Team building programs: opera, theatre, board games night*
